EASILY DIGESTIBLE
MADE WITH EASILY
DIGESTIBLE PROTEIN
INCLUDING FRESH
POULTRY MEAT

**UNIQUE KIBBLE
SHAPE FOR
SMALL/ MEDIUM
BREEDS**

**UNIQUE KIBBLE
SHAPE FOR
LARGE BREEDS**

Brachycephalic dogs are dogs with short muzzles. Some brachycephalic breeds include Pugs, Boston Terriers, English Bulldogs, French Bulldogs, Cavalier King Charles Spaniels, Shar-Pei, English Mastiff, Shih Tzu and Pekinese.

By considering the unique anatomy and breathing difficulties faced by these dogs, specially designed kibbles can help to accommodate their needs.

The flattened snouts of brachycephalic dogs can lead to various respiratory issues, including elongated soft palates and a hypoplastic trachea, which can obstruct their airways and make breathing more challenging. Providing specially shaped kibbles can make it easier for these dogs to pick up and eat their food, as traditional round kibbles may be more difficult for them to grasp with their shorter muzzles.

By customizing the shape of the kibbles, Ultra Pet aims to provide a solution that helps brachycephalic dogs consume their food comfortably and safely. It's important to ensure that these dogs have a well-balanced diet and can enjoy their meal without experiencing further breathing difficulties.

If you have a brachycephalic dog, it's always a good idea to consult with a veterinarian to address any specific dietary concerns or health issues associated with the breed. They can provide guidance on the best nutrition and feeding practices for your pet's individual needs.

WHAT ARE THE BENEFITS OF OUR BRACHYCEPHALIC PRODUCT?

Unique Kibble Shape

This specially designed kibble shape makes it easier for your Brachycephalic dog to eat and enjoy their food.

Nutritionally Balanced

Our best blend of nutrients, vitamins and minerals to enable your dog to live a healthy life.

Promotes Joint Health

Glucosamine, chondroitin and green-lipped mussel extract are included to keep mature joints strong & healthy.

Healthy Digestive System

Formulated with fresh chicken and rice to assist in healthy digestion.

Added Prebiotics

Prebiotics and beet pulp added to assist with digestive tract health.

Healthy Immune System

Antioxidants to help support the immune system.

Healthy Skin and Coat

Omega 3 & 6 fatty acids are included for a healthy skin and coat
